

2-Port Border KM Switch EW-K1302UM

Switch Easily by Using Your Cursor Sliding Across Screen Border

The EW-K1302UM is a 2-port keyboard mouse switch that features our latest Border Switch and True Transparent USB (TTU) Emulation Technology. The Border Switch Technology allows mouse slideover seamlessly between two distinct PC monitors. Thus two distinct desktops can combine into one virtual extended desktop. The TTU Technology can ensure ultimate compatibility to all types of keyboards and mice, giving users a best experience in seamless keyboard mouse switching. Besides, EW-K1302UM supports both PC and Mac, and is specially designed to be used with Tablet PC* with its cradle.

Note: Only Tablet PC with Windows OS is compatible.

True Transparent USB Emulation for all advanced keyboards and mice

Having a new ASIC chip with TTU Emulation Technology, the EW-K1302UM, 2-Port Border Keyboard Mouse Switch, is suitable for functional requirements of all types of advanced keyboards and mice. TTU technology provides a smooth and faithful emulation which enhances your keyboard and mouse working ideally. No matter users are using gaming mice or gaming keypads for high performance in exciting gaming sessions, they will enjoy what the TTU technology provides.

Border Switch Technology

Border Switch Technology is a patented technology that offers an intuitive way to effect an instant Keyboard-Mouse switching to the target computer/tablet PC simply by free cursory movement of the mouse upon crossing the screen border. It is especially designed to fit into the mixed usage scenario of a Tablet PC and desktop PC/Notebook in that user can now access and control both platforms simply by a set of shared keyboard and mouse. Otherwise, one will be obliged to use the software keyboard or touchscreen on Tablet PC and the physical keyboard/mouse on the desktop PC/Notebook. With Border Switch Technology, one can freely roam between Tablet PC and desktop just like an extended screen, using a common set of physical keyboard and mouse. Switching to where your mouse is can be as easy as moving your mouse across screen border and it just switches without your knowing it.

Features

- Border Switch Technology switches seamlessly among two PCs
- Switching just by moving mouse cursor across screen border
- Two distinct desktops combined into one virtual extended desktop
- Specially design to be used with Tablet PC with its cradle
- True Transparent USB Emulation Technology for ultimate compatibility
- Hotkeys available
